for PET bottles and ORTLIEB water containers

transparent drinking tube
length appr. 100 cm

clip for fixation to backpack or clothing

protective cap with valve <=> bottles, ORTLIEB waterbags

protective spring (metal), prevents bending of tube

mouthpiece (bite valve, replaceable)

Recommendation 2/2005, April/May

application example: drinking tube with ORTLIEB waterbag

Length cm/in.	Weight g/oz.
100/39,4	70/2,5

- drinking tube for use with ORTLIEB water containers (waterbags, watersack, waterbelt) and international standard PET bottles
- converts suspended waterbags in a tent e.g. into hydration systems
- ideal with PET bottles in backpacks, bags or in the car
- remove the valve of the ORTLIEB waterbag/watersack/waterbelt, screw cap onto thread of valve cap => bite onto the valve => drink
- one-direction valve inside the cap (for pressure compensation inside the container)
- bite valve for comfortable drinking
- length of tube can be adapted inside the container, protective spring prevents bending of tube
- mouthpiece can be taken apart for hygenical cleaning
- with fixation clip for attaching to backpack or clothing
- cleaning with warm water and liquid soap

Attention: not for use with sodas with gas; clean tube and valve at regular intervals, store only when dry!

Tube comes with biting valve, cap, protective spring and fixation clip
